- Dr. Richard Blythe (R.B.), member of the Executive Office of the International

- The TEP New Leaders Program:

- A section on the contributions of various experts within the field of physical activity
- The conference's schedule and presentation topics
- The impact of the TEP New Leaders Program on the 12th TEP European Congress

- The conference's 12th TEP European Congress logo, featuring a series of letters against a blue background.

- The reason for choosing the 12th TEP European Congress was due to the high demand and the success of the previous congresses. The conference was able to attract a significant number of participants, including both scientists and practitioners from various fields of education.

- The conference focused on the latest research and developments in the field of physical education, with sessions on topics such as

- The importance of physical activity in early childhood development
- The role of education in promoting healthy lifestyles
- The impact of technology on physical activity
- The influence of cultural factors on physical activity participation

- The congress was organized around several themes, including

- The role of physical education in promoting social inclusion
- The impact of physical education on mental health
- The importance of physical education in promoting environmental sustainability
- The role of physical education in promoting healthy eating habits

- The congress included guest speakers from various organizations, including

- UNESCO
- The European Commission
- The World Health Organization

- The congress aimed to bring together experts from different fields to discuss the latest research and developments in the field of physical education.
