List of contributors 19
Preface 1

1 Introduction 2
References 6

Part I Optimal Cache Placement and Delivery 7

2 Coded Caching for Heterogeneous Wireless Networks 9
2.1 Introduction 9
2.2 Overview of Coded Caching 11
2.2.1 Setup and Notation 11
2.2.2 A Small Illustrative Example 12
2.2.3 Achievable rate 13
2.2.4 Approximate Optimality 15
2.3 Non-Uniform Content Popularity 16
2.3.1 The Single-User Setup 19
2.3.2 Multi-User Setup 21
2.4 Multiple Cache Access 24
2.4.1 Overview of Adaptive User-to-Cache Matching 24
2.4.2 System Model 25
2.4.3 Balancing Two Extremes 26
2.4.4 The Pure Coded Delivery (PCD) scheme 27
2.4.5 The Pure Adaptive Matching (PAM) scheme 28
2.4.6 The Hybrid Coding and Matching (HCM) scheme 29
2.4.7 Simultaneous Cache Multi-Access 31
2.5 Wireless Interference Networks: a Separation Architecture 33
2.5.1 Caching in Interference Networks 33
2.5.2 The Separation Architecture 34
2.5.3 Other Network Topologies 38
2.6 Acknowledgement 38
References 39

3 Wireless Device-to-Device Caching Networks 42
3.1 Overview 42
3.2 General Network Model 43
3.3 Uncoded D2D Caching Networks based on Protocol Channel Model 45
3.3.1 Throughput-outage Tradeoff in Single-hop D2D Caching Networks 45
3.3.2 Uncoded Multihop D2D caching 48
3.4 Coded D2D Caching under Protocol Model 54
3.4.1 Discussions 55
3.5 Physical Layer Caching in D2D Networks 57
3.5.1 D2D Caching with Optimal Rule of Treating Interference by Noise 57
3.5.2 D2D Caching Networks with Poisson Point Processes 59
3.5.3 D2D Caching Networks with Cooperations 61
3.6 Mobile D2D caching 65
3.6.1 Mobility-Aware D2D Caching based on Contact and Inter-contact Time 65
3.6.2 Mobility-Aware Centralized D2D Caching based on Random Walks 67

References 69

4 Cooperative Caching in Cloud-assisted 5G Wireless Networks 73
4.1 Cloud-assisted Wireless Networks 73
4.1.1 Cloud Radio Access Network (C-RAN) 74
4.1.2 Mobile-Edge Computing (MEC) 74
4.1.3 Co-deployment of C-RAN and MEC 75
4.2 State of the Art in Cooperative Caching 76
4.3 Cooperative Hierarchical Caching in C-RANs 76
4.3.1 System Model 78
4.3.2 Cache Management Algorithms 80
4.3.3 Performance Evaluation 83
4.4 Cooperative Caching and Video Transcoding in MEC Networks 86
4.4.1 System Model 87
4.4.2 Joint Cooperative Caching and Processing Algorithm 89
4.4.3 Performance Evaluation 91
4.5 Conclusions 94
References 95

5 Stochastic Caching Schemes in Large Wireless Networks 97
5.1 Introduction 97
5.2 Network Model 99
5.3 Performance Metrics and Analysis 100
5.3.1 Cache Hit Probability 101

5.3.2 Cache-Aided Throughput 102
5.3.3 Average Content Delivery Delay 103
5.4 Optimization of Probabilistic Caching Placement 105
5.4.1 Cache Hit Maximization 105
5.4.2 Cache-aided Throughput Maximization 106
5.4.3 Delay Minimization 107
5.5 Numerical and Simulation Results 107
5.6 Conclusions 112
References 113

6 Joint Policies for Caching, Routing, and Channel Selection 115
6.1 Background 116
6.2 Related Work and Our Advances 116
6.3 System Modeling 118
6.3.1 Network setting characterization 118
6.3.2 Network Coding 118
6.3.3 Transmission and Interference Ranges and Capacity of a Link 119
6.3.4 Capturing Interference via a Conflict Graph and Its Independent Sets 120
6.4 Formulation of Joint Caching, Routing, and Channel Selection Policy Problem 121
6.5 Column Generation for Efficient Approximation Solution 122
6.5.1 Formulation of Regulated Master Subproblem 123
6.5.2 Formulation of Slave Pricing Subproblem 124
6.5.3 An Algorithm for An Approximation Solution with ϵ Guarantees 125
6.6 Experimental Evaluation 126
6.6.1 Outline 126
6.6.2 Experimental Setup 126
6.6.3 Experimental Results and Discussion 127
6.7 Benefits for Video Quality of Streaming Application 129
6.8 Concluding Remarks 130
References 132

Part II Proactive Caching 135

7 Learning Popularity for Proactive Caching in Cellular Network 137
7.1 Introduction 137
7.1.1 Background and Motivation 138
7.1.2 Approach and Main Outcomes 138
7.1.3 Optimal Caching Policy 139
7.2 Learning and Predicting Popularity of Unpublished Videos 140
7.2.1 Feature Extraction with Deep Neural Networks 140

7.2.2 Feature Clustering 141
7.2.3 Probability Estimation in Multi-Class Classification 141
7.2.4 Performance Evaluation 142
7.3 Published Set Popularity Updating 144
7.3.1 Cumulative Loss Expectation 147
7.3.2 Two-Expert Scenario 147
7.4 Summary 149
7.5 Appendix: Proof of Theorem 7.1 150
References 156

8 Wireless Edge Caching for Mobile Social Networks 158
8.1 Introduction 158
8.2 Edge Caching for Mobile Social Networks: Challenges and Solutions 161
8.2.1 Hierarchical Social-Network Content Caching 161
8.2.2 Social-Aware Content Caching Placement and Delivery 163
8.2.3 Proactive and Cooperative Social-Network Caching 167
8.2.4 Delay Tolerance Social-Network Caching Policies 169
8.2.5 Privacy and Security for Edge Caching in Mobile Social Networks 170
8.3 Dynamic Edge Caching Approach for Mobile Social Networks 172
8.3.1 Authentication 173
8.3.2 Dynamic Demand Prediction 174
8.3.3 Optimal Caching Strategy 177
8.3.4 Business Model of MSN Service Provider 178
8.3.5 Performance Evaluation 179
8.4 Conclusions and Open Issues 181
References 183

9 A Proactive and Big data-enabled Caching Analysis Perspective 186
9.1 Introduction 186
9.2 Big Data Analytics for Telcos: Requirements, Challenges and Benefits 188
9.2.1 Big Data Networking Challenges and Trends 188
9.2.2 When Big Data Analytics Meets Caching 189
9.3 System Model 190
9.4 Big Data Platform 194
9.4.1 Platform description 196
9.4.2 Data extraction procedures 197
9.4.3 Traffic Characteristics 198
9.5 Numerical Results and Discussions 199
9.6 Conclusions 203
9.7 Acknowledgement 204
References 205

10 Mobility-aware Caching in Cellular Networks 208
10.1 Optimal Caching in Static Networks 208
10.2 Mobility in Cellular Netowork 210
10.3 Overview of System Model 211
10.4 Optimal Caching in Cellular Network 213
10.4.1 Mobile user 214
10.4.2 Static user 219
10.5 Results and Discussion 222
10.6 Outlook 226
References 227

Part III Cache-aided Interference and Physical Layer Management 231

11 Cache-Enabled Cloud Radio Access Networks 233
11.1 Introduction 233
11.2 Cache-Enabled Cloud RAN Model 235
11.2.1 Network Model 235
11.2.2 Content-Centric BS Clustering 236
11.2.3 Caching at BSs 237
11.2.4 Backhauling 238
11.3 Caching at BSs for Cooperation in Access Link 239
11.3.1 Joint BS Clustering and Beamforming Design 240
11.3.2 Performance Evaluation 242
11.4 Caching at BSs for Multicasting in Backhaul Link 244
11.4.1 Joint BS Cache Allocation and Beamforming Design 244
11.4.2 Performance Evaluation 246
11.5 Conclusions and Open Issues 249
References 251

12 Fundamentals of Coded Caching for Interference Management 253
12.1 Introduction 253
12.2 Preliminaries of Interference Networks and Interference Management 254
12.2.1 Interference Channel 254
12.2.2 X Channel 255
12.2.3 Cooperative X-multicast Channel 257
12.3 System Model and Performance Metric 259
12.3.1 Network Model 259
12.3.2 Two-Phase Operation Model 260
12.3.3 Performance Metric 260
12.4 NDT Analysis in Wireless Interference Networks 261
12.4.1 Parametric Caching Scheme 261
12.4.2 Content Delivery Strategy 263
12.4.3 Achievable NDT 263

12.4.4 MIMO Interference Network 268
12.5 Partially Connected Interference Network 269
12.5.1 Network Model 269
12.5.2 Achievable Scheme 270
12.5.3 Achievable NDT 271
12.5.4 Application to Circular Network 272
12.6 Conclusion and Open Issues 272
References 274

13 Full-Duplex Radios for Edge Caching 276
13.1 Introduction 277
13.1.1 Full Duplex Communications 278
13.2 System Model 281
13.2.1 Network Model 281
13.2.2 Cache-aided Network Nodes 282
13.2.3 Channel Model 283
13.2.4 Signal-to-Interference Ratio 284
13.3 Caching Model 285
13.4 Performance Analysis 287
13.5 Numerical Results and Discussion 291
13.6 Conclusions 292
References 296

14 Caching in Mobile Millimeter Wave - Sub-6 GHz Networks 300
14.1 Background, Related Works, and Summary of Contributions 300
14.1.1 Related works 300
14.1.2 Summary of contributions 301
14.2 System Model 302
14.2.1 Channel model 302
14.2.2 Antenna gain pattern 303
14.2.3 Traffic model 304
14.2.4 Handover process and relevant parameters 305
14.3 Caching-Enabled Mobility Management 306
14.3.1 Probability of caching via mmW links 306
14.3.2 Statistics of the caching duration 306
14.4 Performance Analysis of the Proposed Cache-enabled Mobility Management Scheme 307
14.4.1 Average caching data rate 308
14.4.2 Analysis of performance gains from the proposed caching-based mobility management 309
14.5 Proposed Cache-enabled Mobility Management Based on Dynamic Matching 309
14.5.1 Mobility management as a matching game 311
14.5.2 Mobility management based on dynamic matching 313

14.5.3 Proposed algorithm for dynamically stable mobility management 314
14.6 Simulation Results 315
14.6.1 Performance analysis for single user scenarios 315
14.6.2 Performance analysis of the developed algorithm 317
14.7 Summary 319
References 320

Part IV Energy-Efficiency, Security, Economic, and Deployment 323

15 Energy-Efficient Deployment in Wireless Edge Caching 325
15.1 Introduction 325
15.2 Signal transmission and caching model 327
15.2.1 Caching model 327
15.2.2 Transmission model 329
15.3 Energy-efficiency analysis 330
15.3.1 EE analysis for uncoded caching strategy 330
15.3.2 EE analysis for coded caching strategy 331
15.3.3 Comparison between the two strategies 331
15.4 Energy-Efficiency Maximization in Edge-caching Wireless Networks 332
15.4.1 EE maximization for uncoded caching strategy 332
15.4.2 EE maximization for coded caching strategy 334
15.5 Minimization of content delivery time 334
15.5.1 Minimization of delivery time for uncoded caching strategy 335
15.5.2 Minimization of delivery time for coded caching strategy 336
15.6 Non-uniform file popularity distribution 337
15.7 Numerical results 338
15.7.1 Energy efficiency performance 338
15.7.2 Delivery time performance 340
15.8 Conclusions 341
References 343

16 Cache-Enabled UAVs in Wireless Networks 345
16.1 Introduction 345
16.2 Cache-Enabled UAVs for Users' QoE Maximization 346
16.2.1 Motivation 347
16.2.2 Basic Problem 348
16.2.3 Conceptor Echo State Networks for Content Request Distribution and Mobility Pattern Predictions 353
16.2.4 Optimal Content Caching and Locations for UAVs 356
16.2.5 Simulation Results 361
16.3 Summary 364
References 366

17 Physical Layer Security for Edge Caching Wireless Networks 370
17.1 Introduction 370
17.1.1 Literature Survey 370
17.2 System Model 373
17.2.1 Network Topology 373
17.2.2 Caching and Backhaul Loading 374
17.2.3 Secure Cooperative MIMO Transmission 375
17.3 Problem Formulation 376
17.3.1 Achievable Secrecy Rate 376
17.3.2 Second-Stage Online Delivery Optimization 377
17.3.3 First-Stage Offline Cache Training 378
17.4 Problem Solution 379
17.4.1 Optimal Solution of Problem R0 in Large Cache Capacity Regime 379
17.4.2 Suboptimal Solution of Problem R0 381
17.4.3 Solution of Problem Q0 383
17.5 Numerical Examples 384
17.5.1 Performance Comparisons with Baseline Schemes 384
17.5.2 Impact of Number of Antennas 385
17.6 Research Challenges and Opportunities 386
17.6.1 Trustworthiness of Cache-Enabled Devices 387
17.6.2 Imperfect, Statistical, and No CSI Knowledge about the Eavesdropper 388
17.6.3 Active Eavesdropper 388
17.6.4 Other Forms of Cache-enabled PLS Techniques 389
17.7 Summary 389
17.8 Appendix 390
17.8.1 Proof of Theorem 17.2 390
References 391

18 Mobile VR Edge Delivery: Computing, Caching, and Communication Trade-Offs 395
18.1 Introduction 395
18.2 Related work 398
18.3 System models 398
18.3.1 VR data model 398
18.3.2 360° streaming model 401
18.3.3 VR computing and data complexity 402
18.3.4 Cellular network model 402
18.3.5 Reward model 402
18.4 Problem formulation 403
18.5 Polynomial-Time Approximation 404
18.6 Experiment Evaluation 407
18.7 Concluding Remarks 410

References 411

19 Economic Ecosystems in Elastic Wireless Edge Caching 415
19.1 Introduction 415
19.2 Background 418
19.3 Wireless Edge Caching versus In-Network Caching 419
19.4 Elastic Wireless Cache Lease, Content Caching and Routing 420
19.4.1 Scenario 420
19.4.2 Motivating Example of Elastic Cache Lease 421
19.4.3 System Model 422
19.4.4 Problem Formulation 425
19.4.5 Lyapunov-based Elastic CDN Strategy 426
19.5 Open Research Issues 432
19.6 Conclusion 433
