THE WERNER REPORT 50 YEARS ON - SERIES OF EVENTS

THE FUTURE OF MONEY IN THE DIGITAL AGE

The Hague Summit © Belga Photo / Images Globe

Online Research Seminar

High-tech enables payment evolution and global competition. In the digital economy, the emergence of new crypto-assets, their coexistence with the sovereign currencies raise numerous concerns in terms of trust, risk, value, regulation, data security, tax considerations and market infrastructure.

The European Central Bank is committed to study the implication of the crypto-assets ecosystem for monetary policy and financial stability in the euro area.

Lecture and debate with **Claus Brand** (European Central Bank)

The event can be followed online via Webex.
