

SYMPOSIUM, NKG 25 Nordic Gerontology Congress, 2-4 June 2021

Contextual and Life-course Determinants of Later-life Cognitive Functioning and Dementia

1. **Graciela Muniz-Terrera**, University of Edinburgh: *Lessons learned on harmonization, coordinated, and integrative data analysis of longitudinal studies on aging and dementia*
2. **Pavla Cermakova**, Charles University in Prague: *Childhood socioeconomic position and cognitive ageing*
3. **Anja K. Leist**, University of Luxembourg: *Inequality of educational opportunity differentially impacts women's and men's later-life cognitive performance*
4. **Dominika (Nika) Seblova**, Columbia University: *The relationship of residential segregation on later-life cognitive function across race/ethnicity*
5. **Tom Russ**, University of Edinburgh: *Life course air pollution exposure and brain health: modelled historical air pollution data and the Lothian Birth Cohort 1936*

Organized in the framework of the *CRISP Cognitive Ageing* project funded by the European Research Council, grant agreement no. 803239
