

Supplementary material: Supplementary data

Title: Cognitive performance trends among European older adults: exploring variations across cohorts, gender, and educational levels (2007-2017)

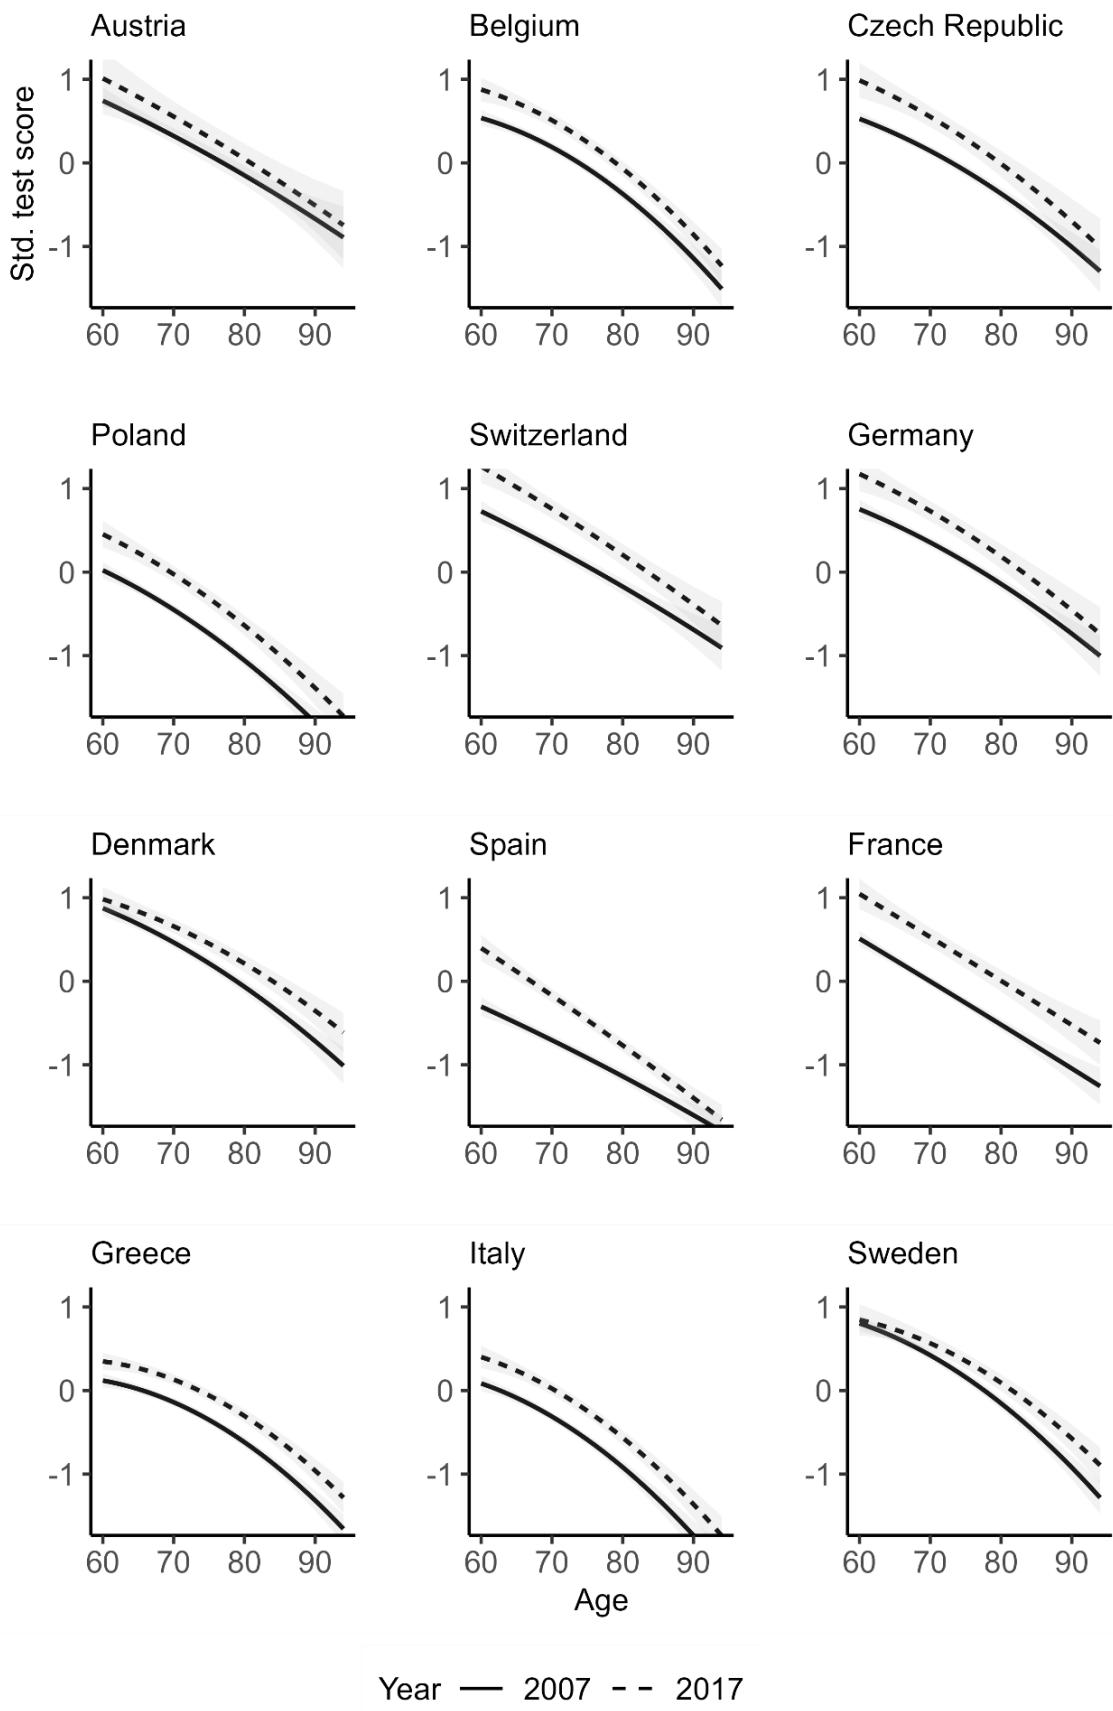

Content

Supplementary table 1-5

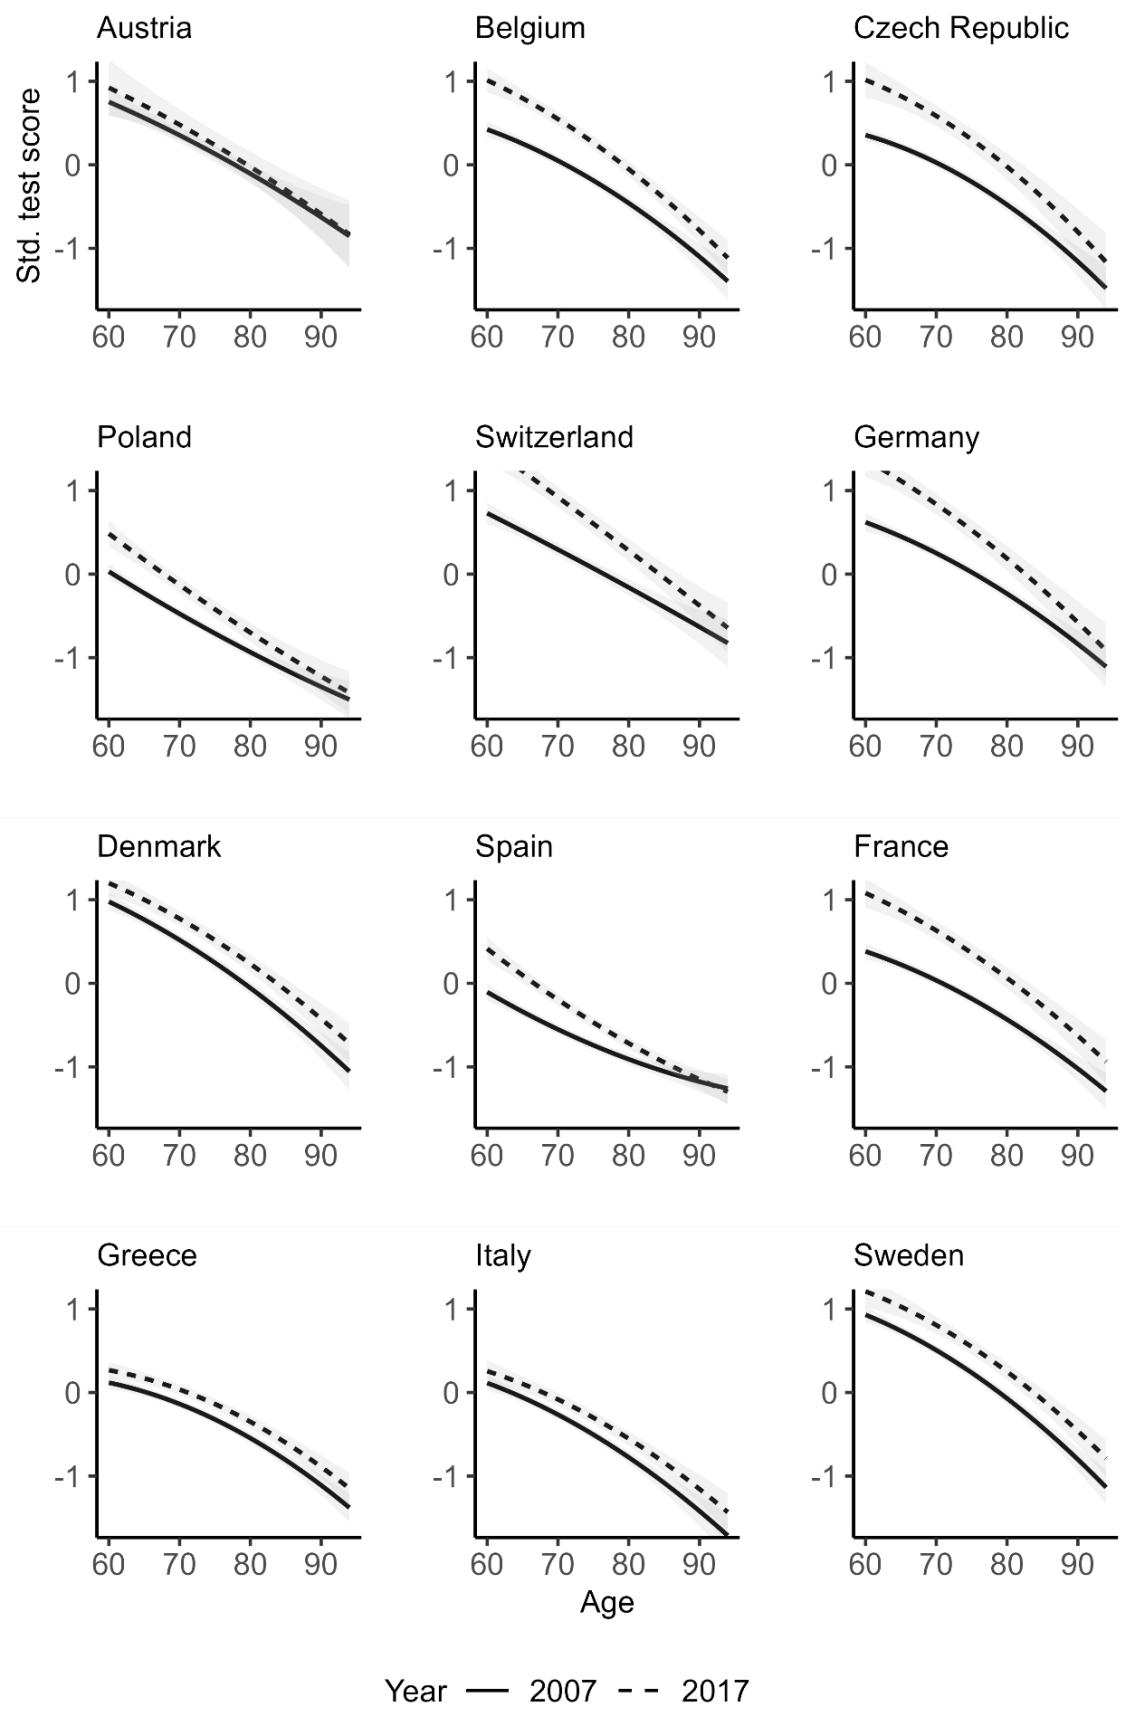

Supplementary figure 1-6

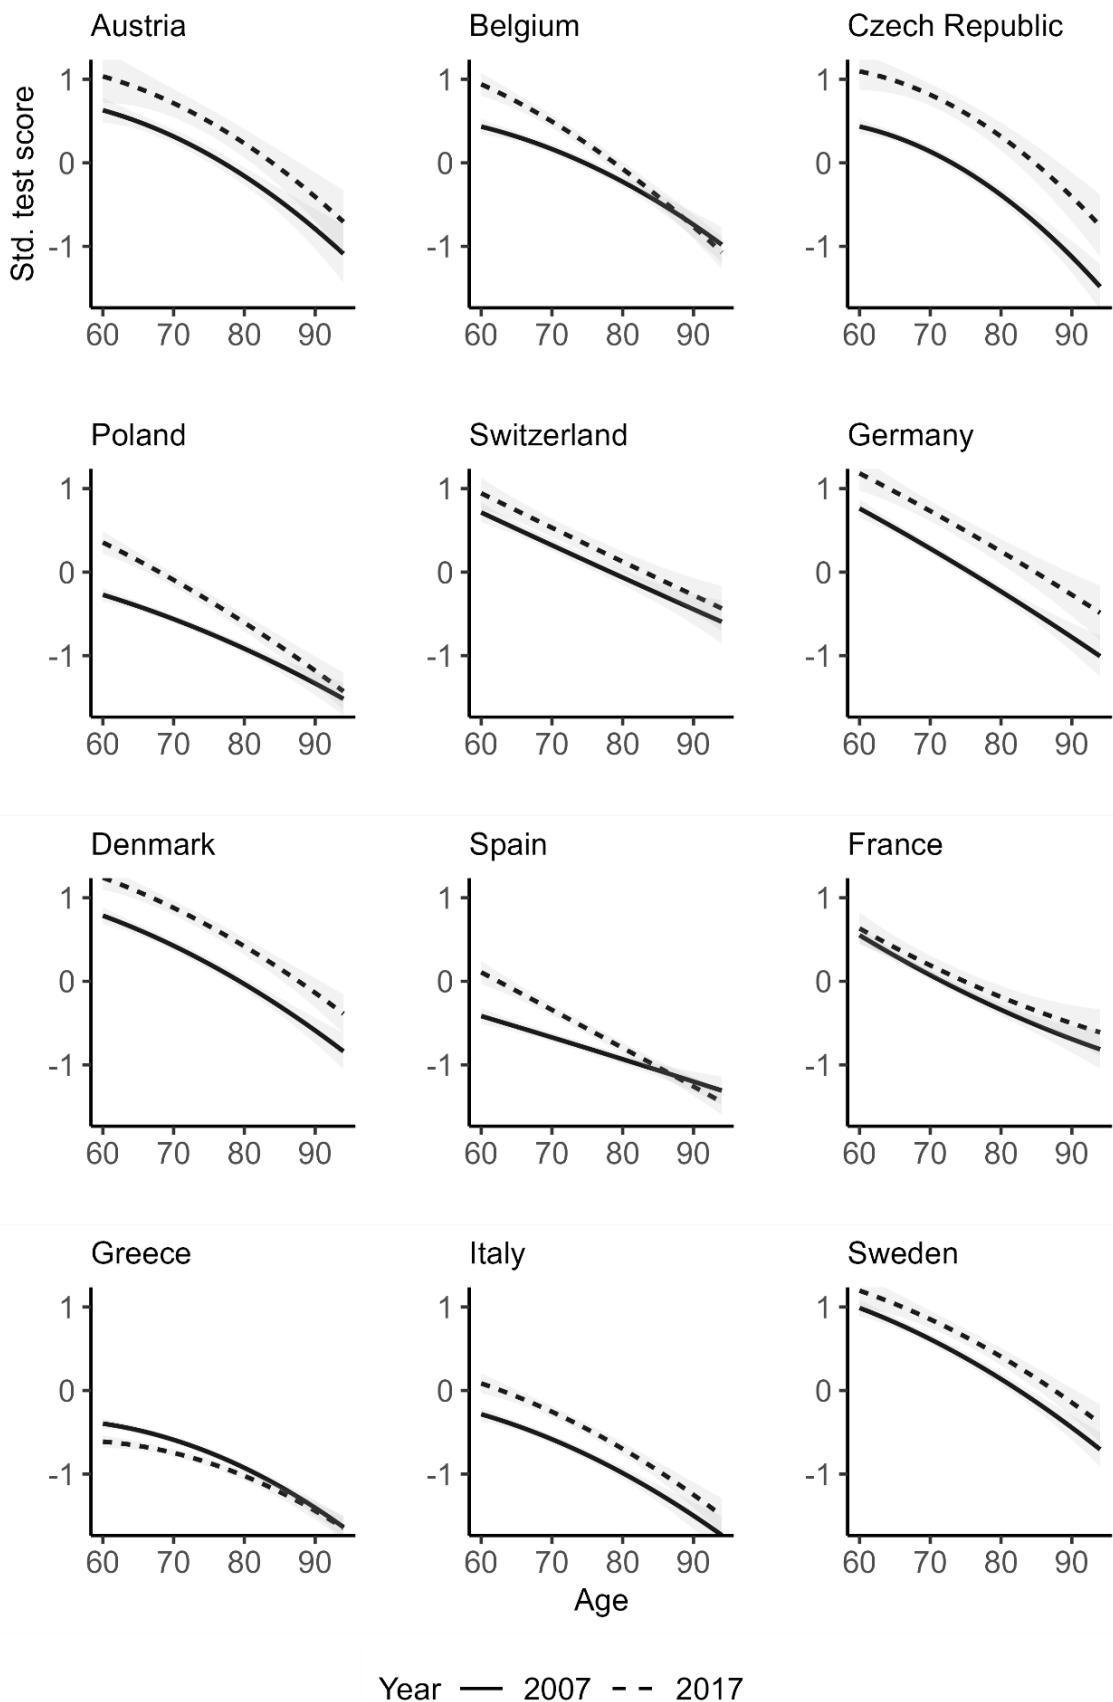

Supplementary Figure 1. Distributions for the cognitive measures: Immediate recall, delayed recall, and verbal fluency and 2017.

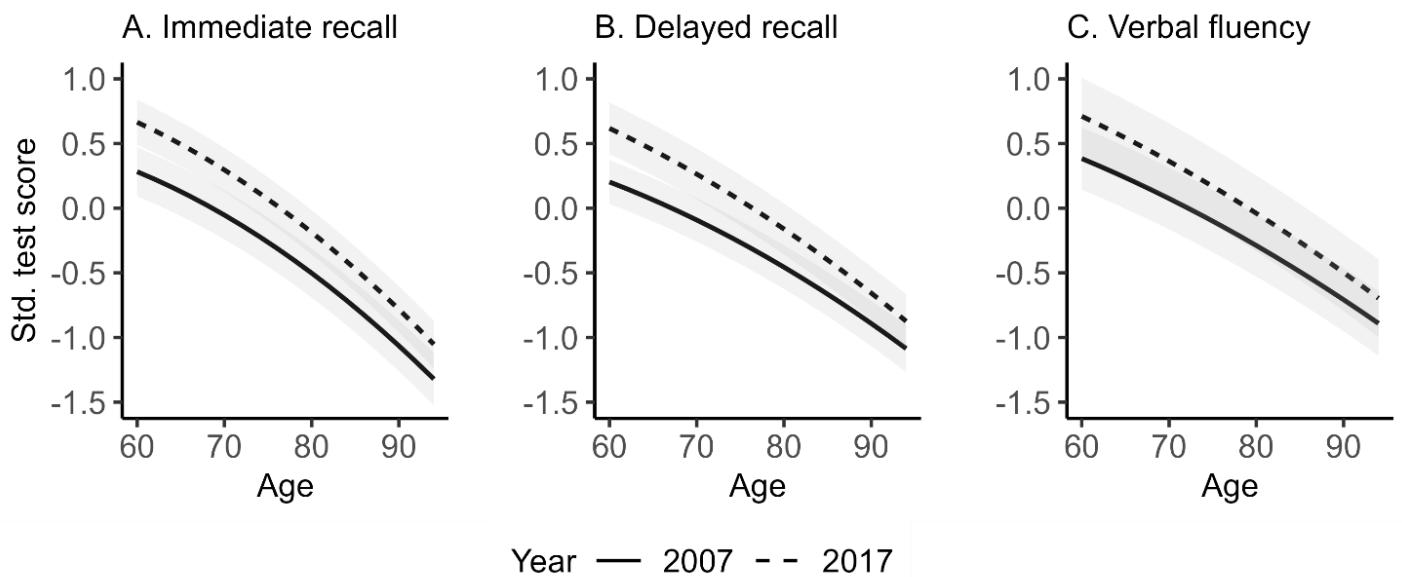

Supplementary Figure 2. Immediate recall scores by country in 2007 and 2017.

Supplementary Figure 3. Delayed recall scores by country in 2007 and 2017.

Supplementary Figure 4. Verbal fluency scores by country in 2007 and 2017.

Supplementary Figure 5a-c. Immediate recall (a), delayed recall (b), and verbal fluency (c) scores by age in 2007 and 2017, n=32 773 (model 1). Grey bands indicate 95 % confidence intervals. See supplementary table 3 for full models.

Supplementary Table 1. The average cohort gain in immediate recall, delayed recall, and verbal fluency score adjusted for number of previous surveys that the respondent participated in (re-test/practice effect). Estimated from linear mixed effects regressions, model 1-3 are the same as in Supplementary Table 3 with the addition of a variable that indicates *number of previous surveys that the respondent participated in*.

| | Average gain between 2007-2017 | LCI, 95% | UCI, 95% |
|-------------------------|-----------------------------------|----------|----------|
| Immediate recall | | | |
| Model 1 | 0.316 | 0.257 | 0.375 |
| Model 2 | 0.245 | 0.184 | 0.306 |
| Model 3 | 0.237 | 0.173 | 0.301 |
| Delayed recall | | | |
| Model 1 | 0.317 | 0.235 | 0.400 |
| Model 2 | 0.258 | 0.173 | 0.342 |
| Model 3 | 0.251 | 0.164 | 0.337 |
| Verbal fluency | | | |
| Model 1 | 0.225 | 0.121 | 0.328 |
| Model 2 | 0.162 | 0.049 | 0.276 |
| Model 3 | 0.152 | 0.041 | 0.262 |

Note: Model 1 adjusted for number of previous surveys, age, sex, and measurement year; model 2 adjusted for model 1 + education; model 3 adjusted for model 2 + smoking, BMI, depression, physical inactivity, and hearing. LCI, lower confidence interval; UCI, upper confidence interval.

Supplementary table 2. Coefficient for the variable *number of previous surveys that the respondent participated in* (ranging from 1-5) for models estimating: immediate recall, delayed recall, and verbal fluency score. Estimated from linear mixed effects model, see Supplementary Table 1.

| | Coefficient | LCI, 95% | UCI, 95% |
|-------------------------|-------------|----------|----------|
| Immediate recall | | | |
| Model 1 | 0.031 | 0.023 | 0.040 |
| Model 2 | 0.026 | 0.018 | 0.035 |
| Model 3 | 0.019 | 0.011 | 0.027 |
| Delayed recall | | | |
| Model 1 | 0.027 | 0.019 | 0.036 |
| Model 2 | 0.023 | 0.015 | 0.031 |
| Model 3 | 0.018 | 0.010 | 0.026 |
| Verbal fluency | | | |
| Model 1 | 0.063 | 0.054 | 0.071 |
| Model 2 | 0.058 | 0.049 | 0.066 |
| Model 3 | 0.051 | 0.043 | 0.059 |

Note: Model 1 adjusted for number of previous surveys, age, sex, and measurement year; model 2 adjusted for model 1 + education; model 3 adjusted for model 2 + smoking, BMI, depression, physical inactivity, and hearing. LCI, lower confidence interval; UCI, upper confidence interval.

Supplementary table 3. Linear mixed effect models for outcomes: immediate recall, delayed recall, and verbal fluency. Figure 1, Figure 2, Supplementary Figure 5, and Table 2 are estimated based on these models.

| | Model 1 Fig. 1, Suppl. Fig. 1., Table 2 n=32 773 | | | Model 2 Fig. 2, table 2 n=32 773 | | | Model 3 Table 2 n=32 642 | | |

| Age | -0.030 | -0.027 | -0.031 | -0.032 | -0.032 | -0.034 | -0.037 | -0.039 | -0.038 |
| Sex (1=women) | 0.045 | 0.134 | 0.134 | 0.089 | 0.077 | 0.101 | 0.098 | 0.055 | 0.077 |

Supplementary Table 5. Standard deviations in immediate recall (a), delayed recall (b), and verbal fluency (c) scores in 2007 and 2017. Calculated from non-standardised variables.

Delayed Recall

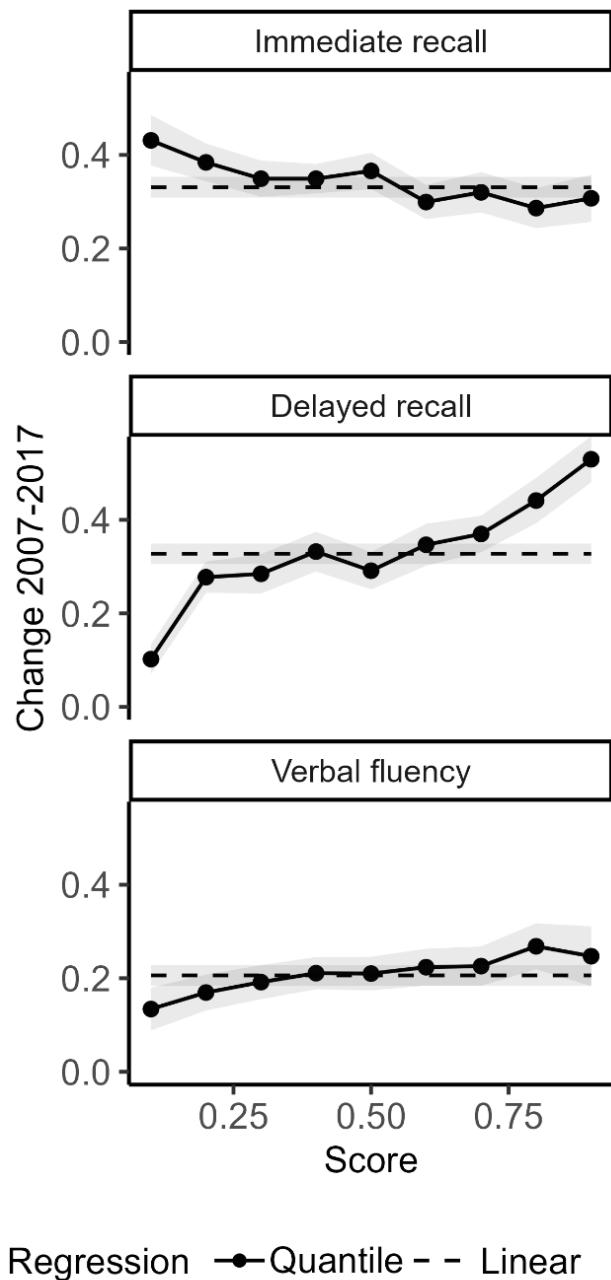

| | Wave 2 (2007) | Wave 7 (2017) |
|-------|---------------|---------------|
| 60-64 | 1.65 | 1.58 |
| 65-69 | 1.67 | 1.53 |
| 70-74 | 1.67 | 1.60 |
| 75-79 | 1.72 | 1.66 |
| 80-84 | 1.79 | 1.74 |
| 85-89 | 1.80 | 1.81 |
| 90-94 | 1.76 | 1.88 |

Immediate recall

| | Wave 2 (2007) | Wave 7 (2017) |
|-------|---------------|---------------|
| 60-64 | 1.90 | 2.05 |
| 65-69 | 1.90 | 1.97 |
| 70-74 | 1.82 | 2.04 |
| 75-79 | 1.83 | 1.99 |
| 80-84 | 1.80 | 1.99 |
| 85-89 | 1.66 | 1.90 |
| 90-94 | 1.48 | 1.72 |

Verbal fluency

| | Wave 2 (2007) | Wave 7 (2017) |
|-------|---------------|---------------|
| 60-64 | 7.15 | 7.77 |
| 65-69 | 7.02 | 7.57 |
| 70-74 | 6.70 | 7.21 |
| 75-79 | 6.52 | 7.37 |
| 80-84 | 6.72 | 7.10 |
| 85-89 | 6.22 | 6.84 |
| 90-94 | 6.67 | 7.57 |

Supplementary Figure 6. Change in immediate recall, delayed recall, and verbal fluency between 2007 and 2017 in the entire sample. Dotted line shows the average change in the entire sample estimated from a linear regression, full solid lines show changes at every 10th percentile estimated from quantile regression. Grey bands indicate 95 % Confidence intervals. Adjusted for age and sex (n=32 773).
